

2005 BILL

1 AN ACT *to create* 118.018 of the statutes; **relating to:** science instruction in
2 public schools.

Analysis by the Legislative Reference Bureau

This bill directs each school board to ensure that any material presented as science within the school curriculum is testable as a scientific hypothesis, describes only natural processes, and is consistent with any description or definition of science adopted by the National Academy of Sciences.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

3 SECTION 1. 118.018 of the statutes is created to read:

4 **118.018 Science instruction.** The school board shall ensure that any
5 material presented as science within the school curriculum complies with all of the
6 following:

7 (1) The material is testable as a scientific hypothesis and describes only
8 natural processes.
