Take a Stand for Science

Evolution is a critical topic in science education. As a fundamental and unifying principal in the life sciences, understanding evolution is important for understanding and advancing biology and medicine. Yet, in spite of its importance, challenges to teaching evolution are occurring across the country. *You can ensure that students receive a high quality science education by responding to these challenges when they arise.*

Support Evolution Education

- ◆ Stay informed of state and local initiatives
- ◆ Write to newspapers and policy makers
- ◆ Serve as a resource for science teachers
- ◆ Speak at school board meetings
- ◆ Work with your scientific society

FASEB Can Help

FASEB's Office of Public Affairs has developed and compiled resources to help:

- ◆ Background information and talking points
- ◆ Resources for writing letters and op-eds
- ◆ Guidelines for communicating with policy makers
- ◆ Tips for testifying at school board meetings
- ◆ Presentations you can modify and use
