The National Institutes of Health (NIH) is the nation’s primary medical research agency, supporting research efforts in all 50 states and the District of Columbia. Its mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce the burdens of illness and disability.

Wyoming institutions hold two active Institutional Development Award (IDeA) grants.

13 NIH-supported clinical trials were initiated at Wyoming institutions in FY 2014.

Two Wyoming businesses received NIH funding totaling $800,000 for the research and development of technologies with potential commercial applications.

Wyoming is home to 137 bioscience business establishments. In 2012, residents held 883 bioscience industry jobs, and the average annual wage in the bioscience sector was $24,288 higher than the private sector overall.
